1. The first of these is the
 fact that the system is
 not a simple one, but a
 complex one, involving
 many different factors.
 2. The second is the fact
 that the system is not
 static, but dynamic, and
 is constantly changing.
 3. The third is the fact
 that the system is not
 uniform, but varies from
 place to place, and from
 time to time.
 4. The fourth is the fact
 that the system is not
 self-sufficient, but
 depends on the outside
 world for many of its
 needs.
 5. The fifth is the fact
 that the system is not
 perfect, but is subject to
 many defects and
 imperfections.
 6. The sixth is the fact
 that the system is not
 inflexible, but is capable
 of being modified and
 improved.
 7. The seventh is the fact
 that the system is not
 isolated, but is in
 contact with the outside
 world.
 8. The eighth is the fact
 that the system is not
 self-contained, but
 requires the input of
 many different resources.
 9. The ninth is the fact
 that the system is not
 self-sustaining, but
 requires the input of
 many different resources.
 10. The tenth is the fact
 that the system is not
 self-sufficient, but
 depends on the outside
 world for many of its
 needs.
